

COMPUTING METHODS IN HEP Exercise 11 Spring 2024

(To be returned by 10:15 on Friday 19.4.)

1-2 Download a simulated Drell-Yan datasample from the CERN open data portal

<http://opendata.cern.ch/record/12353>.

Write an analysis based on a ROOT TSelector to select events passing the trigger HLT_IsoMu24. Plot the pileup distribution.

Please push your answers into your public git repository.
